AUTOMATING MICROSOFT SHAREPOINT 2010 ADMINISTRATION WITH WINDOWS POWERSHELL 2.0

Wiley India Pvt. Ltd, 2011. Softcover. Book Condition: New. SharePoint is a $1.3 billion business for Microsoft. Due to SharePoint 2007, Microsoft saw tremendous growth in the enterprise content management (ECM) market, where SharePoint`s market increased nearly 50% while the ECM market as a whole grew 16.5%. In May 2010, Microsoft released SharePoint 2010 with richer content management functionality, scalability, and governance. The 2010 release also fills in some of the social computing gaps that existed in SharePoint 2007. SharePoint 2010 is a much more robust product than its predecessor but along with that, Microsoft made automation an integral part of SharePoint 2010 administration, making Windows PowerShell 2.0 a software requirement for installing SharePoint 2010. PowerShell is also deeply integrated in Windows Server 2008 R2, Exchange Server 2010, Active Directory, etc. PowerShell is expected to change the future of administration. Introduction.
