

History of Cultivated Vegetables, Vol. 2 of 2: Comprising Their Botanical, Medicinal, Edible, and Chemical Qualities; Natural History; And Relation to Art, Science, and Commerce (Classic Reprint) (Paperback)

By JR. Henry Phillips

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from History of Cultivated Vegetables, Vol. 2 of 2: Comprising Their Botanical, Medicinal, Edible, and Chemical Qualities; Natural History; And Relation to Art, Science, and Commerce This beautiful plant is called in Latin, Nasturtium Indicum. Gerard observes, The seede should be sown vpon a bed of hot horse-dung, and some fine sifted earth. It is now as hardy as any annual plant, and the self-sown seeds generally produce the strongest plants. The major variety of this brilliant plant was not brought to Europe until the year 1684, and two years afterwards it was cultivated in our gardens. This plant has been named Acriviola, of acer, sharp, and viola, violet, i. e. Sharp Violet. The blossoms have been observed to emit electric sparks towards evening, which was first noticed by the daughter of the illustrious Linnaeus, who could not credit the account until he had seen the phenomenon. It is seen most distinctly with the eye partly closed. The double-flowered nasturtium has an agreeable perfume, but is not so well tasted as the single, and being only...

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
