IN SEARCH OF A JOINT URBAN OPERATIONAL CONCEPT

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x4 mm. This item is printed on demand - Print on Demand Neuware - Combat operations in the urban area are not new to warfare. The United States'; military conducted large-scale urban operations in World War II, Korea, and Vietnam. During the last sixty years, the United States'; Army approached the urban area by rubbleing or isolating the city. The combination of the increasing potential for urban operations and political restraints on friendly and non-combatant casualties reduces the usefulness of these historical approaches. Joint forces need a new urban operational concept that achieves strategic aims without rubbleing the city or causing politically unacceptable levels of non-combatant and friendly casualties. Current joint operational concepts such as Joint Vision 2020 do not provide a view of future warfare. Emerging operational concepts such as Rapid Decisive Operations depend on long-range surveillance and engagement of enemy forces to reduce the requirement of close combat. The search for a joint urban operational concept is analogous to the Russian search for a new method of warfare during the inter-war period of the World Wars. Russian theorists realized the difficulty of destroying an enemy system with an attrition-linear attack. Operational Shock approached the enemy as a system and attacked its hierarchic nature attempting to create operational disunity. A survey of operational shock and systems theory revealed five critical aspects to creating this systemic effect. These aspects, attacking control, maneuver, simultaneity, depth, and achieving cognitive effects, were contrasted with the unique nature of the urban area. 74 pp. Englisch.
