Technology and Applications List Price: 98.00 yuan of : Publisher: Electronic Industry Press Publication Date: July 1. 2012 ISBN: 9787121173974 Words: Page: 350 Edition: 1st Edition Binding: Paperback: Weight: 1 Kg Editor's Choice foreign electronic communication textbook series : semiconductor wafer cleaning: Science. Technology and Application both as a College of Electronic Science and Technology, the basis of materials of microelectronics and solid state electronics, optoelectronics and photovoltaic students learning reference books. but also as the newly recruited self-study materials and reference materials for the functional semiconductor industry practitioners, researchers, and related technical personnel. In addition, foreign electronic communication textbook series: semiconductor wafer cleaning: science, technology and application process training materials can also be used as a discrete semiconductor device manufacturing, integrated circuit processing and semiconductor process equipment production company. Summary abroad Electronics and Communication textbook series: semiconductor wafer cleaning: science, technology and applications Introduction: the semiconductor manufacturing process is the key material to discrete devices or integrated system, including the cleaning process is the most commonly used process steps. Abroad Electronics and Communication textbook series: semiconductor wafer cleaning: science, technology and application details with discrete semiconductor devices and VLSI chip manufacturing various wafer cleaning technology, focused on the development process of cleaning technology. The basic principles and practical applications. The book is divided into five parts and thirteen chapters: the first part introduces the semiconductor wafer contamination type, cleaning the course of development and evolution of the technology, as well as the process of the silicon surface trace...
