The recent publications of the Rev. M. J. Berkeley, the first living authority on this branch of botany, have much smoothed the way for students of the English species. His Outlines of British Fungology, together with the series of papers now appearing in the Intellectual Observer, constitutes an excellent guide. The only published memoranda on the Fungi of Northumberland and Durham are, so far as I know, those contained in Winch s Flora, which, of course, aro very imperfect, and not at all consonant with the present state of science. Indeed many microscopic forms are there included amongst the Algae. The life-history of the terrestrial Algae and their relations to the young forms of Lichens and Fungi is a subject full of interest, and having in it work for a lifetime: a most painstaking and able commencement of this enquiry has already been made by Dr. J. B. Hicks. Both for this, and for the study of the Fungi in particular, our damp northern climate offers many advantages, while the varied physical features of our two counties (comprising as they do great variety of soil and elevation--wooded, sheltered glens, alternating with exposed moorland and arid crag) would doubtless afford a large variety of species to the diligent hunter. During the excursion of the Club, last autumn, to Knarsdale and Barhaugh Burn, I noticed a great number of species, some of them of enormous size and wonderful beauty of colour. Some of these I collected...
